

# PRESCRIPTION PHARMACEUTICAL MANAGEMENT KIOSK

## MODEL: SCE303-F

A revolutionary addition to the healthcare sector, prescription pharmaceutical management kiosk combines AI technology and self-developed medicine dispensing technology to standardise, personalise, and digitise the medicine distribution process. It is fully-automated and can be installed at almost any location, allowing citizens to address their medicinal needs at their own convenience.

### SUITABLE FOR

Hospitals & clinics

### PAIN POINTS

- Risk of spreading diseases with high clinic traffic
- Complicated manual work flow and delay in data management

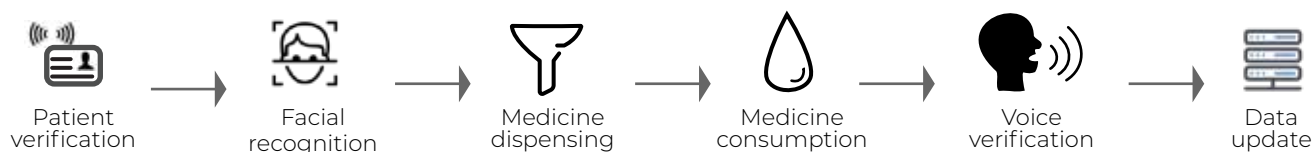

### KEY BENEFITS

- ✓ Reduce hospital and clinic traffic and staff physical contact
- ✓ Available at all hours across disperse locations
- ✓ Identity verification, speeds up work flow
- ✓ Enhance service quality

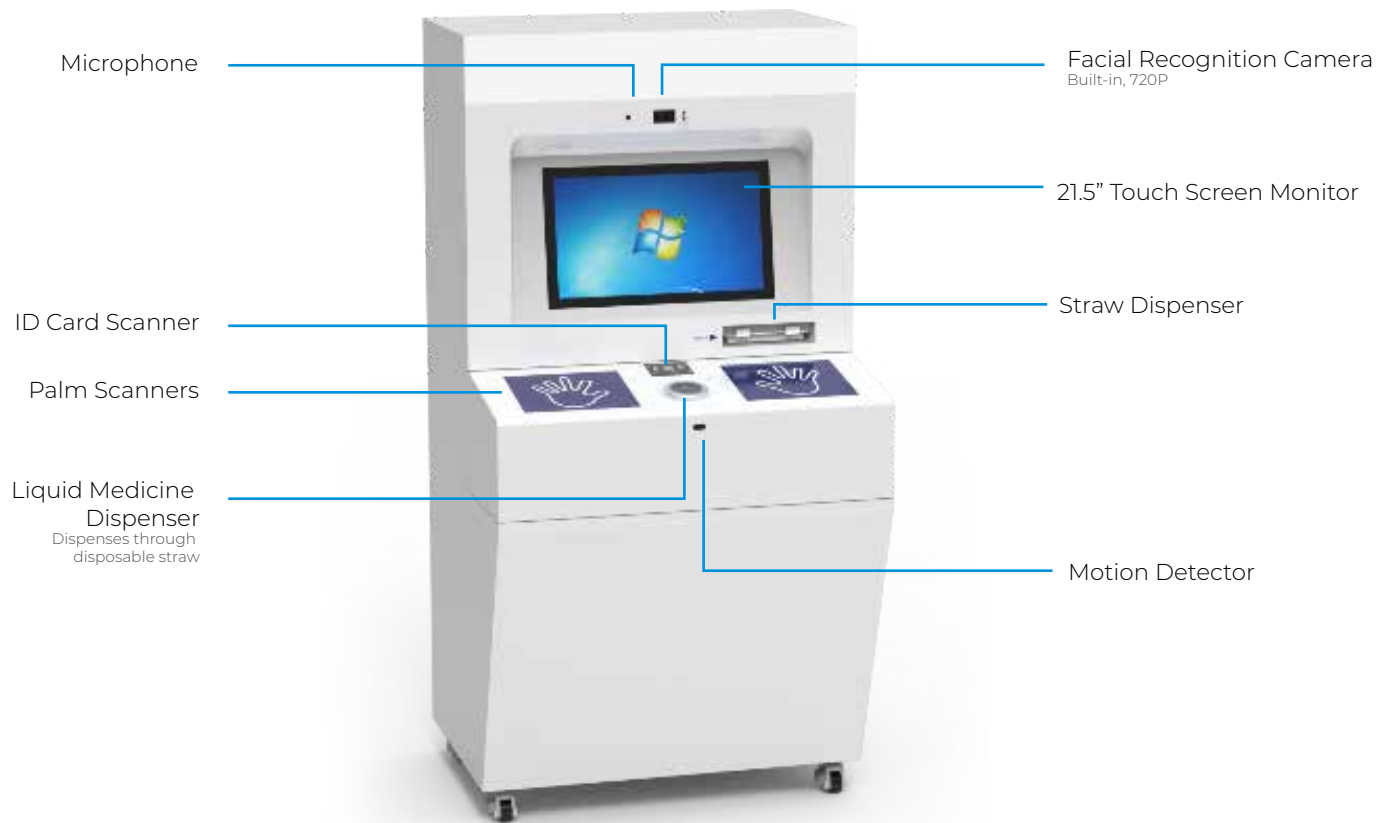

### KIOSK FEATURES

- Identity verification using identity card, facial recognition and voice verification
- Proprietary medicine dispensing technology
- Management of patient information, prescription details, and medicine stock levels
- Intelligent operation and management of data, smart guidance, robust security control, and easy device management.

### USER FLOW
